I.T. PROJECT MANAGER, ANALYST, PROGRAMMER

Software ~ Communications ~ Security ~ Continuity ~ Quality

Dedicated technical professional with extensive IT-related experience for World Class companies and smaller organizations. Proven interpersonal skills with effective communication to all levels of staff, management, stakeholders and vendors. Break down complex technical concepts into easy to understand business or non-technical terms, and vice versa to provide liaison between clients and developers. Skilled team leader; direct multiple tasks effectively, master new software and tools, and produce consistent results while saving millions for the company. Fresh, energetic, integrity.

- Windows NT/2000/XP,VISTA,Win7, Novell, UNIX, GIS, Data Backup, Data/Extract-Transform-Load

-

PROFESSIONAL EXPERIENCE

- Rare clean pass on IBM Corporate Data Security Audit.
- Key contributor on two major efforts for disaster recovery / business continuity planning.
- On Time, On Budget – Project Manager for (American Century's) first International Fund.
- Improved effectiveness – Created I.T. support group to design standards, training, studies.
- Designed, created and conducted numerous technical and corporate training classes.
- Published in systems journals – Earned reputation as subject matter expert on data security, disaster recovery / business continuity, programming tools, data analysis, relational databases. Advanced techniques used in various companies' operational systems. PC / Network Support.
- Avoided future losses estimated \$15 Million, avoiding long-term implementation of key software purchased based on fraudulent claims made by the software firm during sales process.
- Saved estimated \$3 Million long term – solved major inter-systems communications problems.

VARIED POSITIONS * Interim non-career roles to support family **2009-2011**

- Valuable experience: learned sales side of business; working with smaller companies enabled me to gain a more whole-enterprise perspective in operations, supply, sources, cash-flow, Accounts Receivable, management, recruiting, event planning, administrative assistance, benevolence administered, viewed how areas are interdependent in their impact on each other.

STATE OF KANSAS PeopleSoft Analyst **2008-2009**

** In PeopleSoft tools training prior to budget-deficit-required layoffs

SUNGARD InvestarOne Software Developer / Technical Analyst **2006-2008**

- Directed multiple simultaneous rapid-fire small to mid-size projects with requirements gathering, design deliverables, programming, testing, troubleshooting for domestic / international clients.
- Improved documentation and procedures, while preparing for conversion to UNIX / ORACLE.

PROFESSIONAL EXPERIENCE: Continued

AEROTEK / GARMIN (Contract Position) Technical / Product Support **2006-2006**
Functional support for all generations of hardware and software for array of Garmin GPS products.

VARIOUS POSITIONS ** Interim non-career roles to support family **2002-2006**

CITIES UNLIMITED VP Business Development **1999-2000**
Directed executive summary, private placement memorandum, and subscription agreement efforts

SPRINT – Maxim Group / EDS / Midwest Consulting Group **1997-1999 and 2000-2002**

Senior Technical Consultant, Senior Project Manager

- Selected for Program Manager role (as contractor), normally reserved for Sprint employees.
- Led a team of developers and performed data conversion analysis for \$27M conversion project.
- Saved estimated \$3 Million in wages/time – Facilitated ad-hoc team to solve major system error.
- Technical lead on 12,000-hour project, key design deliverable, mapped conversion to new data.
- Designed, documented and team-taught Production Support class to train employees.
- Created Production Support team to correct programs damaging to system data integrity.
